DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 8-14, and 29-33 drawn to an apparatus having microneedles capable of being ruptured, classified in class 604, subclass 96.01.
 - II. Claims 15, 17-19 and 21-26, drawn to an apparatus having microneedles with lumens in fluid communication with an interior compartment of a balloon, classified in class 604, subclass 102.02.
 - III. Claims 27 and 28, drawn to an apparatus having microneedles disposed upon a plate which is attached to a balloon wall, classified in class 604, subclass 99.01.
2. Inventions I, II and III are directed to related products. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have materially different design. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
